

Accessory Guide

This guide is intended to assist you in combining your Fusion Stone type and colour with our accessory colours in a way that best suits your design style.

We have matched each of the Fusion Stone colours with our three accessory colours in one of three ways:

Popular – This combination is selected most often because of its closely matching colour characteristics.

Contrasting – This combination provides a distinct colour variation between the stone and the accessory.

Monochromatic – As the name suggests this single, solid colour provides a near match to the selected Fusion Stone colour.

ASH

COCOA

CHAMOIS
